Material Safety Data Sheet (MSDS)

Product	10-1811 Petroselinic Acid (6c)
Molecular weight	282.48
Physical state	Liquid at room temperature
Fire hazard	Although presenting no special hazard in normal use, this product will burn and could contribute to an existing fire.
Toxicity & handling	Toxicological and physiological effects are not known.
Storage	In freezer
Disposal	In accordance with local regulations
General	This product is intended to be used for laboratory purposes only, i.e. solely in research and analytical applications. This product should be handled by properly trained personnel. It should be kept in mind that although toxicological and physiological effects of many compounds are not well defined, hazardous products may arise by chemical reactions.
